## WORK EXPERIENCE

### **Director of Finance @ WestGate Church**

FEB 2019 - CURRENT // *San Jose, CA*

- Managed large complex finance-related programs in a church of 3000+ attendees, 40+ staff members, and \$9MM+ annual budget
- Automated significant portions of month-end reconciliations and reduced recon turnaround time by 80%
- Revamped manual and error-prone budget creation process across 60 departments, eliminating 90% of meetings, increasing stakeholder satisfaction, and accurately completing the process in record time

### **Software Engineer Intern @ Livestack**

FEB 2021 - MAR 2021 // *San Francisco, CA*

- Developed backend endpoints in Express for users to follow one another, pay tips, and add/change default payment methods using Stripe
- Designed and developed React frontend functionality for users to follow/unfollow one another
- Created unit and integration tests to increase test coverage for payments and follow/unfollow backend endpoints

### **Youth Pastor @ New Life Vision Church, Vision Community Church**

OCT 2015 - DEC 2018 // *Los Angeles, CA*

- Developed student information tracking spreadsheet app used by staff and volunteers, which led to a 20% increase in student satisfaction
- Trained and developed a team of 20 volunteers to mentor and empathetically counsel students, while increasing team morale
- Created and presented motivational leadership and character development content weekly to over 100 students

### **Business Analyst @ Anritsu**

OCT 2013 - AUG 2015 // *Morgan Hill, CA*

- Regularly presented data analysis to executives and influenced business decisions, reducing \$400,000 in annual shipping expenses and improving customer service issue resolution turnaround times by 20%
- Developed VBA programs to reduce time spent creating key reports by 75%, allowing stakeholders to get actionable data on a regular basis

### **Business Transformation Consultant @ IBM**

AUG 2010 - NOV 2012 // *San Francisco, CA*

- Managed the collaboration between end-users and developers to ensure that reporting system development met business requirements
- Developed complex SQL-based test scripts to validate accuracy of reporting system, and trained incoming team members in SQL
- Created detailed documentation on business processes and reporting system functional specifications
